*** Definition of a monochromic image**

A black and white work fitting from the very dark gray (black) to the very clear gray (white) is a monochrome work with the various shades of gray. A work black and white toned entirely in a single colour will remain a monochrome work able to stand in the black and white category; such a work can be reproduced in black and white in the catalogue of a salon under FIAP Patronage. On the other hand a black and white work modified by a partial toning or by the addition of one colour becomes a colour work (polychrome) to stand in the colour category. Such a work requires colour reproduction in the catalogue under FIAP Patronage.
